DEMO SYNTHETIC DRILLING DATA - OIL INDIA LIMITED HACKATHON PROTOTYPE

=====

Well Name: DEMO-W001 (Offset South)
Field: Dikom / Greater Dibrugarh Area
Date: 2024-03-15 | Report Number: DDR-42 | Rig: Synthetic-Rig-01
Depth: 3420.0 m (MD) | Formation: Barail Sandstone

OPERATIONAL SUMMARY & INCIDENT DETAILS:

Event: MUD_LOSS (Lost Circulation Incident)

Severity: HIGH

Observed Symptoms: Sudden drop in pit volume (-28 bbls/hr) and standpipe pressure drop (180 psi).

Cause: Intersected high-permeability thief zone / micro-fracture corridor in Barail Sandstone.

Impact: Lost 65 bbls of KCL-Polymer mud before circulation could be controlled.

Mitigation: Reduced pump rate from 680 gpm to 420 gpm. Pumped 40 bbl high-viscosity LCM pill (nut plug & m

Lesson Learned: Pre-treat active system with medium coarse LCM 50m prior to entering Barail Sandstone hori

DRILLING PARAMETERS AT TIME OF INCIDENT:

WOB: 22.5 klbs | RPM: 110 | Torque: 14.8 kft-lbs | Mud Weight: 1.28 SG | ECD: 1.34 SG

Flow Rate: 550 gpm | Standpipe Pressure: 2850 psi | ROP: 14.2 m/hr
